Promote a Healthy Workforce and Improve Your Bottom Line

Join us for a training that will provide insight into the impact that substance use has on the workforce, employees, and employers. The training will provide an opportunity for employers to enhance workplace supported recovery while decreasing company expenses.

Research shows that employees in recovery miss less work, are more productive, less likely to leave their employer, and utilize company benefits less often than even those employees who have not been impacted by substance use. The training will also discuss no cost training and support services available through the Northwest Wisconsin Workforce Investment Board for employees who have been impacted by substance use to skill, or upskill, to better serve the employer's needs.
